Saint Louis University Transgender Health Collaborative: Strategic Map 2020

Promote the Health and Well-being of the Transgender Community

Advance gender-affirming healthcare

Promote research productivity related to transgender health

Train future healthcare professionals to be competent in genderaffirming practices through clinical education

Elevate the transparency of existing clinical practice sites within SLU and affiliate organizations

Increase the number of peer-reviewed publications with interdisciplinary authorship

Integrate existing education materials into clinical education curricula

Support new/emerging clinical practice sites within SLU and affiliate organizations Submit and obtain grants that represent interdisciplinary research teams Develop new clinical education materials for both discipline-specific and interdisciplinary use

Increase access to genderaffirming healthcare at SLU; address known barriers Deliver scholarly presentations at local, regional, and national conferences Support the development of clinical rotations, internships, externships, etc. centered on genderaffirming healthcare

Support continuing education opportunities for SLU healthcare professionals

Foster relationships with relevant community-based organizations
